

Kids Beating Cancer Pediatric Transplant Center at Florida Hospital for Children in memory of John Robert Voight

Kids Beating Cancer
Pediatric Transplant
Center welcomes
new Medical Director,
David Shook, MD

In 2011, Kids Beating Cancer established the Kids Beating Cancer Pediatric Transplant Center at Florida Hospital for Children with a pledge of one million dollars. Today's children as well as future generations diagnosed with leukemia, cancer and 80 other malignant and non-malignant life threatening diseases now have a place dedicated to curing their disease, the first and only pediatric bone marrow and stem cell transplant center in Central Florida. Any child can come to the Kids Beating Cancer Pediatric Transplant Center regardless of insurance coverage or family's financial means.

THE PEDIATRIC TRANSPLANT CENTER INCLUDES:

- Eight private rooms that can accommodate families on an overnight stay
- State-of-the-art amenities, including our GetWell Network, a family lounge, and a fully-equipped playroom
- A positive air system, created so children can leave their rooms while remaining in a safe, clean environment
- A world-class team of pediatric cancer physicians, specialists, and staff who are focused on beating pediatric cancer on all levels
